Education

New York University

Bachelors of Science in Computer Science

 $\mathrm{Sep}\ 2020 - \mathrm{May}\ 2023$

Brooklyn, NY

Experience

Detail Software Development Engineer

San Francisco, CA 02/2025 — Present

Detail: Writing code

AWS Bedrock Software Development Engineer

Seattle, WA 12/2023 — 01/2025

Bedrock: Creating Generative AI infrastructure for AWS Bedrock. Part of the core team and launched/maintained key features like batch inference, model distillation, and provisioned throughput with AWS-Wide and ReInvent visibility.

Amazon Last Mile Software Development Engineering Intern

Seattle, WA 05/2022 — 08/2022

Data Aggregation Service: Created a full stack service to visualize last mile delivery data. Created a Typescript React frontend with Polaris styling that calls an AWS backend implemented with Java Lambda Functions, API Gateway, S3, and Internal Amazon Services. Used S3 Select and Spark to filter through about 1TB per query.

NYU High Speed Research Network (HSRN) Academic Researcher

Brooklyn, NY 02/2021 — 05/2023

Parallel File System: Deployed an NSF funded 6PB storage PFS (SeaweedFS) for usage internally and externally to the HSRN. Automated Deployment with Ansible Playbooks and Rust CLI. Benchmarked with Bonie++ and IOR.

Audio Conferencing: Created an audio service (Portaudio) in C++ that interfaces with internal broker service.

CI/CD: Developed documentation, linting, testing, deployment (DinD with Kaniko) pipelines for the project in Gitlab

Mentorship: Founder of the student research arm. Managed and onboarded over 110 students over 5 semesters

Hewlett Packard Enterprise (Aruba Networks) Cloud Intern

Santa Clara, CA 06/2019 — 08/2019

Estimating Bandwidth: Estimated bandwidth using Auto ARIMA/Prophet and other time series algorithms.

Dark Forest Graphics Intern

San Jose, CA 12/2021 — 02/2022

Shader Development: Created a typescript plugin that allows for custom WebGL shaders in the Dark Forest game.

Projects

pong-wasm: A RL model for pong trained with policy gradients built with candle, compiled to wasm, and runs in your browser. Utilized web features like IndexedDB, Web Workers and custom serialization with hacks into wasm-bindgen.

mnist-wasm: A framework-less (just ndarray), resource efficient, rust based wasm model that trains/predicts in your browser. Built with just in time spawned web-workers, the rust-based yew frontend framework, axum, wasm-bindgen/gloo K3S Cluster: Created a portable resilient fault-tolerant k3s cluster that networks through a wireguard mesh (headscale). Wrote openresty lua to filter by SNI and stream Proxy Passed Requests. Created custom monitoring, uptime, and a wiki Invoice Categorization: Automatically sorts invoices into categories with Bedrock Batch, Flask, React, Tailwind. Wrote a preprocessing step with a common crawl adapter to supplement data about companies. Also dogfooded my service.

Wikipedia Editor: Used PySpark, Cohere Embeddings, NYU HPC/ SLURM to analyze 6TB of dumps. Found metrics on the breath of topics wikipedia editors touch with LDA and the variance of topics they edit.

Apps Status: Built an API with Rust, Tokio Async, Axum, and Request that proxies status for my self-hosted apps through a Rust Lambda function with a custom Megalodon-rs that pushes outage statuses to Mastodon every 5 min Sembox: A drive with semantic searching over documents with blip, xsum, whisper, bert, mui/nextjs, by taking the cosine similarity of summaries/search terms. Supports images, text, video, audio through intelligent document type recognition

Tweet Toxicity: Used DistilBERT, Pytorch, HuggingFace Transformers, Streamlit and AdamW to classify toxicity type Resow: Created a better Craigslist free section with ReactJS, MUI, Open Layers, Express, MongoDB, S3, Mocha, Jest

Ansible Batch Runner: Used Rust and Clap to create a cli for batch running and managing Ansible Playbooks

Skills

Courses: Deep Learning Systems, Machine Learning Systems, Operating Systems, Computer Networking, Linear Algebra Langs: Typescript, Javascript, Go, C++, C, Rust, Java, Python, (e)Lisp, Bash/Zsh, Cuda, Kotlin, Perl, Lua, LATEX

Certifications

AWS Solutions Architect
AWS Cloud Practitioner
Stanford Machine Learning by Andrew Ng

September 2021

August 2021

July 2020
